

PARV UPADHYAY

Muzaffarnagar, India • parv.upadhyay@email.com • [LinkedIn](#) • [GitHub](#)

Results-driven Computer Science undergraduate specializing in **AI/ML and Software Engineering**. Experienced in architecting end-to-end intelligent systems, including real-time computer vision models and full-stack mobile applications. Proven ability to optimize low-latency cloud architectures and deploy scalable solutions. **Microsoft Azure AI Associate** with a strong foundation in Data Structures and Algorithms.

KEY PROJECTS

RecycleEasy – AI-Powered Recycling Assistant

[Flutter](#), [YOLO](#), [Flask](#), [OCR](#)

- Engineered a real-time waste classification system using **YOLOv8**, trained on a curated dataset of **15,000+ images**, achieving high precision across 10+ categories.
- Architected a full-stack cross-platform mobile application using **Flutter**, integrated with a **Flask REST API** for cloud-hosted inference.
- Implemented **OCR-based material recognition** and geospatial mapping for localized recycling center discovery, increasing user engagement.
- Optimized mobile-to-cloud communication, reducing end-to-end inference latency by **30%**.

Speech Emotion Recognition System

[Python](#), [CNN](#), [ANN](#), [MFCC](#), [Cloud](#)

- Designed a hybrid **CNN-ANN** deep learning architecture for multiclass emotion classification from raw audio signals.
- Processed audio using **MFCC (Mel-frequency Cepstral Coefficients)** feature extraction, improving model sensitivity to tonal variations.
- Deployed the model on cloud infrastructure with a responsive web interface, achieving seamless real-time performance.

AI Education Assistant

[Machine Learning](#), [Gradio](#), [Python](#)

- Built an intelligent academic platform featuring **student risk prediction** and automated quiz generation using ML classification models.
- Integrated a **Gradio** interface to simplify user interaction with complex predictive analytics and NLP logic.

Generative AI: Text-to-Image Generator

[Stable Diffusion](#), [Hugging Face](#), [PyTorch](#)

- Leveraged **Stable Diffusion** models via Hugging Face to build a high-fidelity image synthesis application.
- Optimized inference pipelines to ensure rapid response times for complex text-prompt processing.

TECHNICAL SKILLS

Programming

Python, Java, C/C++, SQL

AI / Machine Learning

Deep Learning (CNN, ANN), NLP, Generative AI, YOLO, OCR, Model Evaluation

Frameworks & Tools

TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Hugging Face, Flask, Gradio, Git/GitHub

Cloud & Deployment

Azure, REST APIs, Flutter, HTML/CSS/JS, Cloud Integration

EDUCATION

GLA University

B.Tech in Computer Science (AI/ML & IoT)

2023 – 2027 | CPI: 6.97

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- 100 Days of Code & DSA (150+ Problems)
- Google & HP Technical Certifications

ACHIEVEMENTS

- Hackathon Participant & Tech Workshop Lead
- Consistent contributor to open-source AI projects
